

GhaniFoods - Full System Testing Report

Generated: 2026-08-23 02:13:03 | Duration: 137s | Overall: **PASS WITH WARNINGS**

Summary

Metric	Value
Files scanned	105
Static findings (High/Med/Low)	4 (0/2/2)
Functions (OK/Suspect/Broken)	234 (230/4/0)
Build steps (Pass/Fail)	3 / 0
Backend API (live-tested)	28 / 28 working
Frontend pages (live-tested)	22 / 22 loading OK
RPC smoke test (real payload)	NOT RUN (-RunRpcSmokeTest)

Phase 1: Alpha Testing - Static Findings

File	Line	Severity	Category	Snippet
apps\backend\src\index.ts	8	MEDIUM	Hardcoded localhost URL	const DEFAULT_DEV_ORIGIN = "http://localhost:3000";
apps\backend\src\index.ts	23	LOW	console.log left in code	console.log(`[\${new Date().toISOString()}] \${req.method} \${req.path}`);
apps\backend\src\index.ts	124	LOW	console.log left in code	console.log(`GhaniFoods backend running on port \${PORT} (origin: \${FRONTEND_ORIGIN})`);
apps\frontend\components\ui\auth-page.tsx	23	MEDIUM	any type used (weak typing)	// Dummy auth: any non-empty credentials succeed

Phase 1b: Function / Logic Audit (non-OK only)

File	Function	Line	Status	Reason
apps\backend\supabase\functions_shared\client.ts	statusForPgError	17	SUSPECT	Empty function body ho sakta hai
apps\backend\supabase\functions_shared\client.ts	jsonResponse	24	SUSPECT	Empty function body ho sakta hai
apps\backend\supabase\functions\data-export\index.ts	ensureSpace	214	SUSPECT	Empty function body ho sakta hai
apps\backend\supabase\functions\data-export\index.ts	drawText	221	SUSPECT	Empty function body ho sakta hai

Phase 2: Beta Testing - Build/Typecheck

Step	Status	Duration(ms)
Backend: npm install	PASS	6028
Backend: TypeScript build (tsc)	PASS	5549
Frontend: Next.js build	PASS	100276
Supabase Edge Functions inventory	INFO	0

Phase 3: UAT Checklist

Flow	Status
Login / Auth flow (apps/frontend/app/(auth)/login)	PENDING MANUAL CHECK
Dashboard KPIs load correctly (dashboard-kpis function)	PENDING MANUAL CHECK
Raw Materials: create / list / history	PENDING MANUAL CHECK
Production Batches: create batch, view detail, leftover sources	PENDING MANUAL CHECK
Packing Runs + Preview	PENDING MANUAL CHECK
Finished Cartons stock view	PENDING MANUAL CHECK
Carton Configurations: create / update	PENDING MANUAL CHECK
Customers: create / ledger / item prices / invoices	PENDING MANUAL CHECK
Invoices: create, PDF export, price lookup, back-context	PENDING MANUAL CHECK
Payments recording	PENDING MANUAL CHECK
Purchase Receipts: create / list / update / delete	PENDING MANUAL CHECK
Suppliers history	PENDING MANUAL CHECK
Monthly Expenses + Overhead allocation	PENDING MANUAL CHECK
Reports: Inventory / P&L / Production / Finished Carton availability	PENDING MANUAL CHECK
Data Export / Data Delete (danger zone)	PENDING MANUAL CHECK
Settings page	PENDING MANUAL CHECK

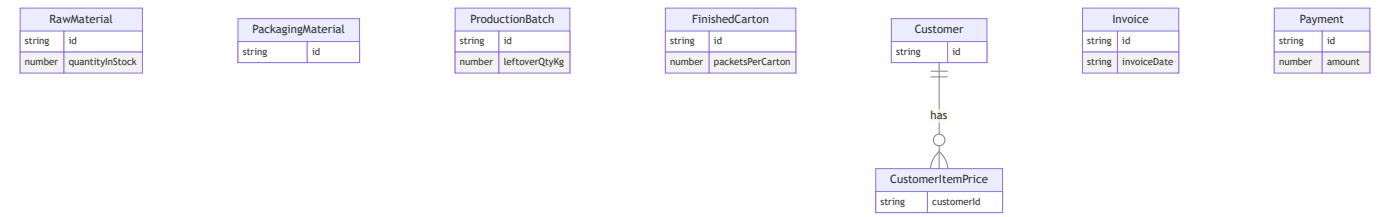

Phase 4: Button / Click-Handler Audit (heuristic, static scan)

Ye static code scan hai, actual browser click-testing nahi. LOW severity = false positive ho sakta hai.

File	Line	Severity	Issue	Snippet
apps\frontend\components\ui\sidebar-component.tsx	296	LOW	onClick='onClick' - is naam ka function isi file me define nahi mila (import se aa sakta hai, manually check karein)	type="button" title={label} aria-label={label} className={`flex flex-col items-center justify-center gap-0.5 rounded-lg w-14 min-w-14 h-12 transition-colors duration-500 \${isActive ? "bg-[var(--surface-hover)] text-[var(--foreground)]" : "hover:bg-[var(--surface-hover)] text-[var(--text-muted)] hover:text-[var(--text-secondary)]"} style={{ transitionTimingFunction: softSpringEasing }} onClick={onClick}
apps\frontend\components\ui\sidebar-component.tsx	413	LOW	onClick='onToggleCollapse' - is naam ka function isi file me define nahi mila (import se aa sakta hai, manually check karein)	type="button" onClick={onToggleCollapse} className="flex items-center justify-center rounded-lg size-10 min-w-10 transition-all duration-500 hover:bg-[var(--surface-hover)] text-[var(--text-muted)] hover:text-[var(--text-secondary)]" style={{ transitionTimingFunction: softSpringEasing }} aria-label="Expand sidebar"
apps\frontend\components\ui\sidebar-component.tsx	437	LOW	onClick='onToggleCollapse' - is naam ka function isi file me define nahi mila (import se aa	type="button" onClick={onToggleCollapse} className="flex items-center justify-center rounded-lg size-10 min-w-10

			sakta hai, manually check karein)	transition-all duration-500 hover:bg-[var(--surface-hover)] text-[var(--text-muted)] hover:text-[var(--text-secondary)]" style={{ transitionTimingFunction: softSpringEasing }} aria- label="Collapse sidebar"
apps\frontend\components\ui\sidebar-component.tsx	550	LOW	onClick='close' - is naam ka function isi file me define nahi mila (import se aa sakta hai, manually check karein)	type="button" onClick={close} aria-label="Close menu" className="lg:hidden absolute top-4 right-4 flex items-center justify-center size-8 rounded-lg hover:bg-[var(--surface-hover)] text-[var(--text-muted)]"
apps\frontend\components\ui\topbar.tsx	130	LOW	onClick='toggle' - is naam ka function isi file me define nahi mila (import se aa sakta hai, manually check karein)	type="button" onClick={toggle} aria-label="Open menu" className="lg:hidden flex items-center justify-center size-9 rounded-lg hover:bg-[var(--surface-hover)] text-[var(--foreground)] shrink-0 border border-[var(--surface-border)]"

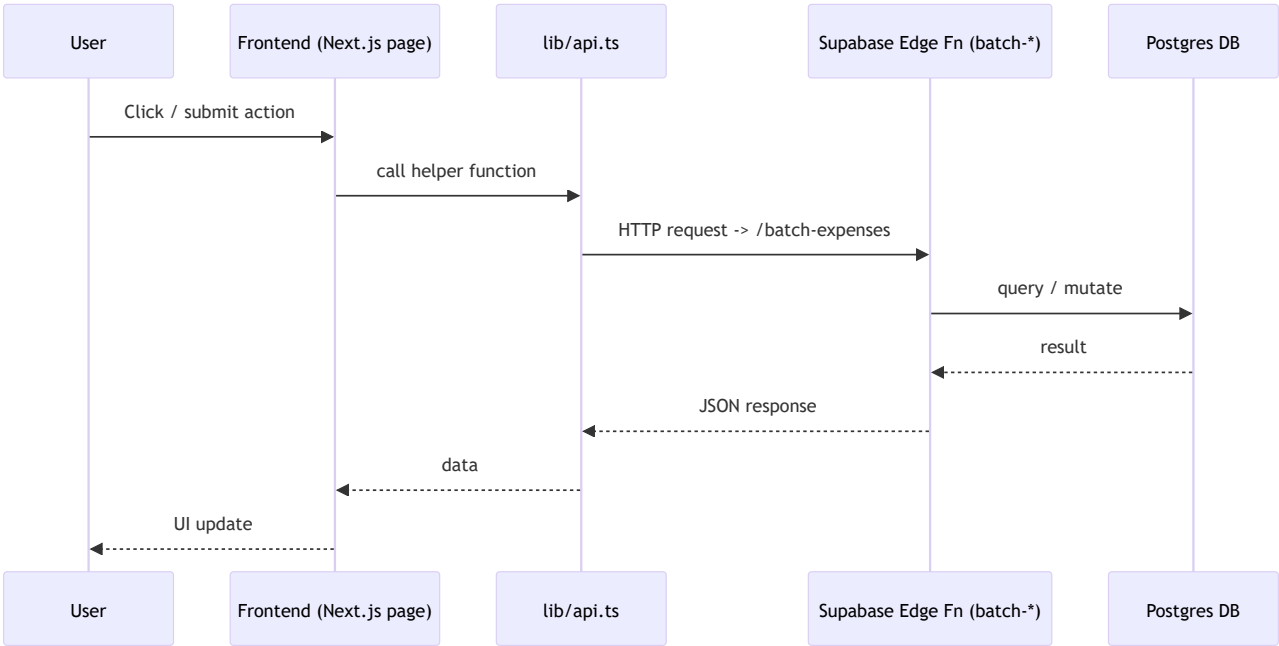

Phase 5: Domain Model (ER Diagram)

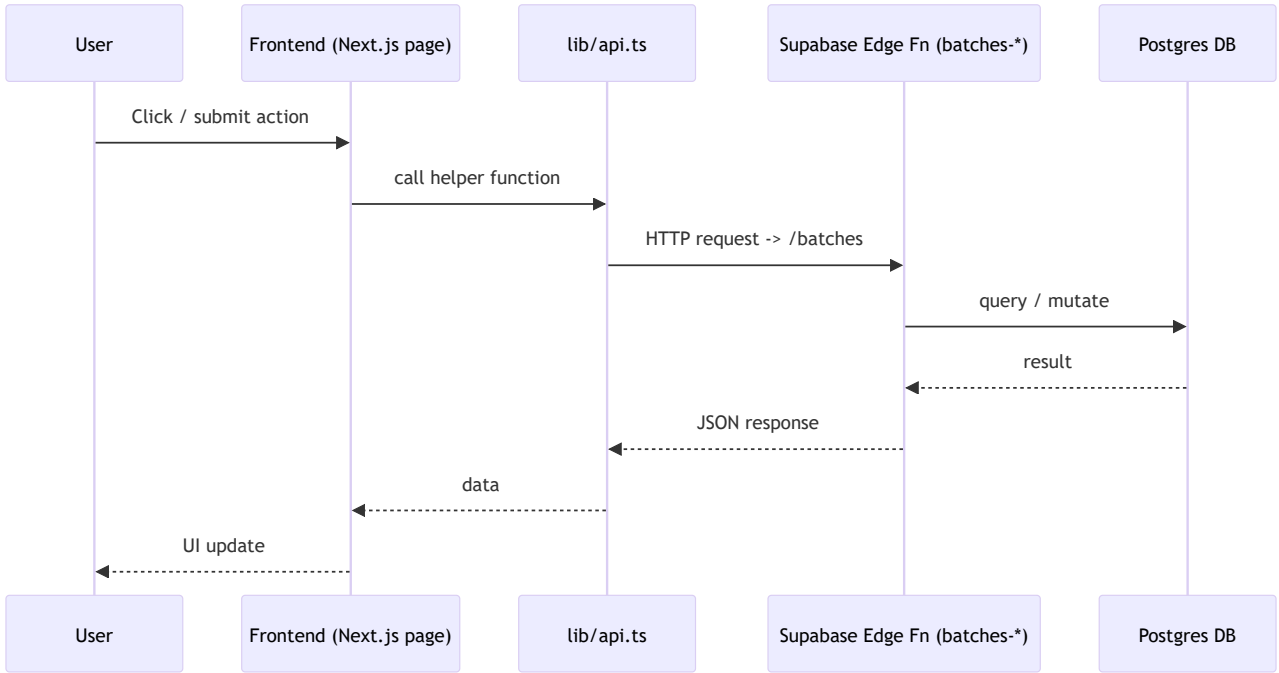

Entity	Fields
RawMaterial	id: string, quantityInStock: number
PackagingMaterial	id: string
ProductionBatch	id: string, leftoverQtyKg: number
FinishedCarton	id: string, packetsPerCarton: number
Customer	id: string
Invoice	id: string, invoiceDate: string
Payment	id: string, amount: number
CustomerItemPrice	customerId: string

Phase 6: Sequence Diagrams (per module)

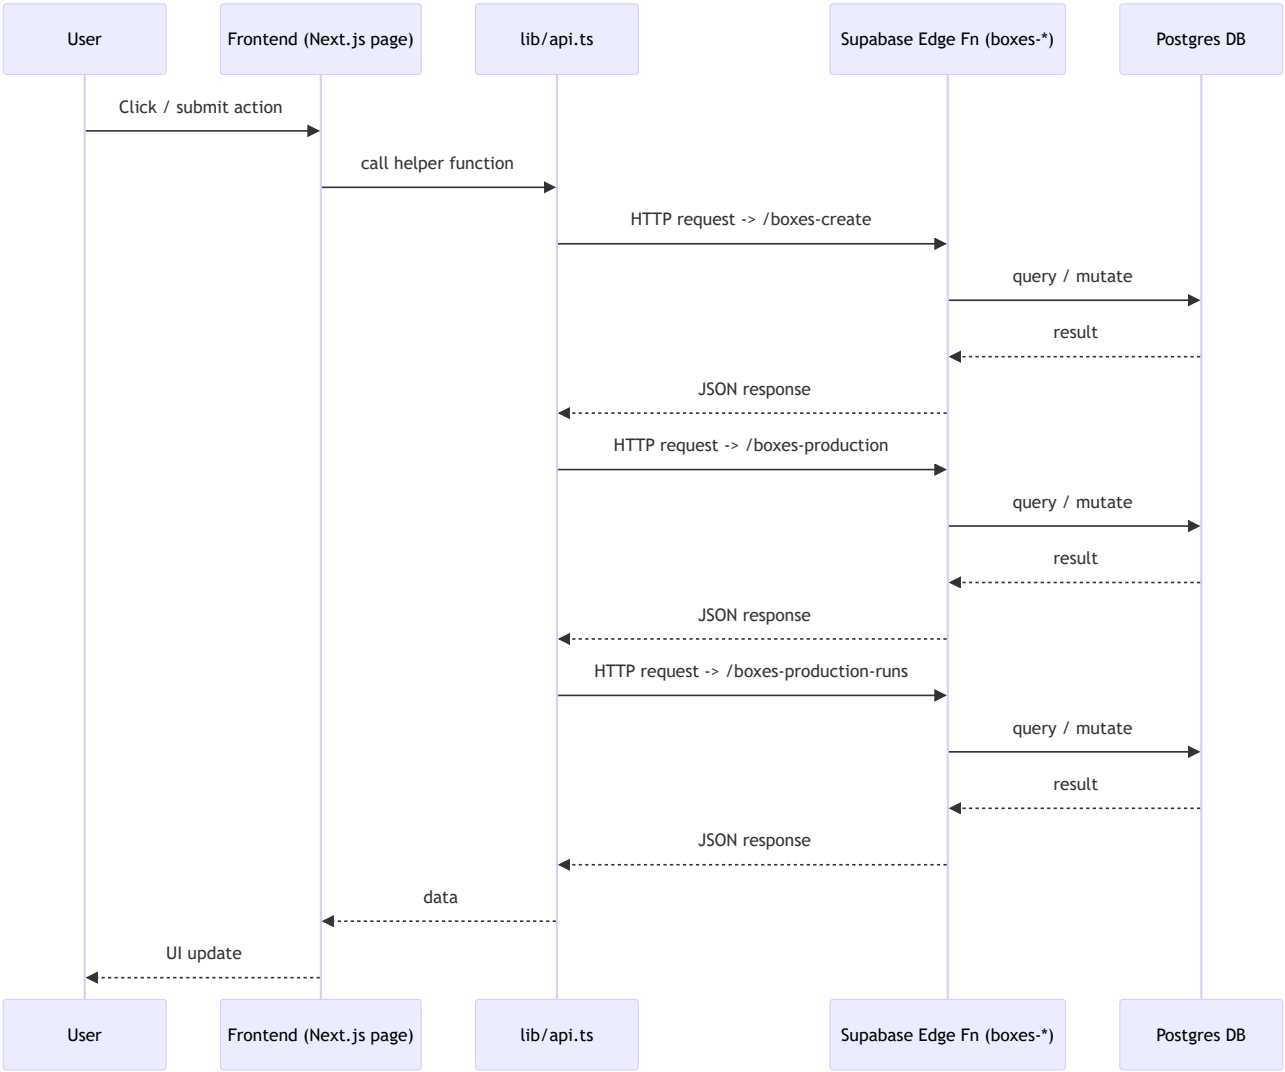

Module: batch

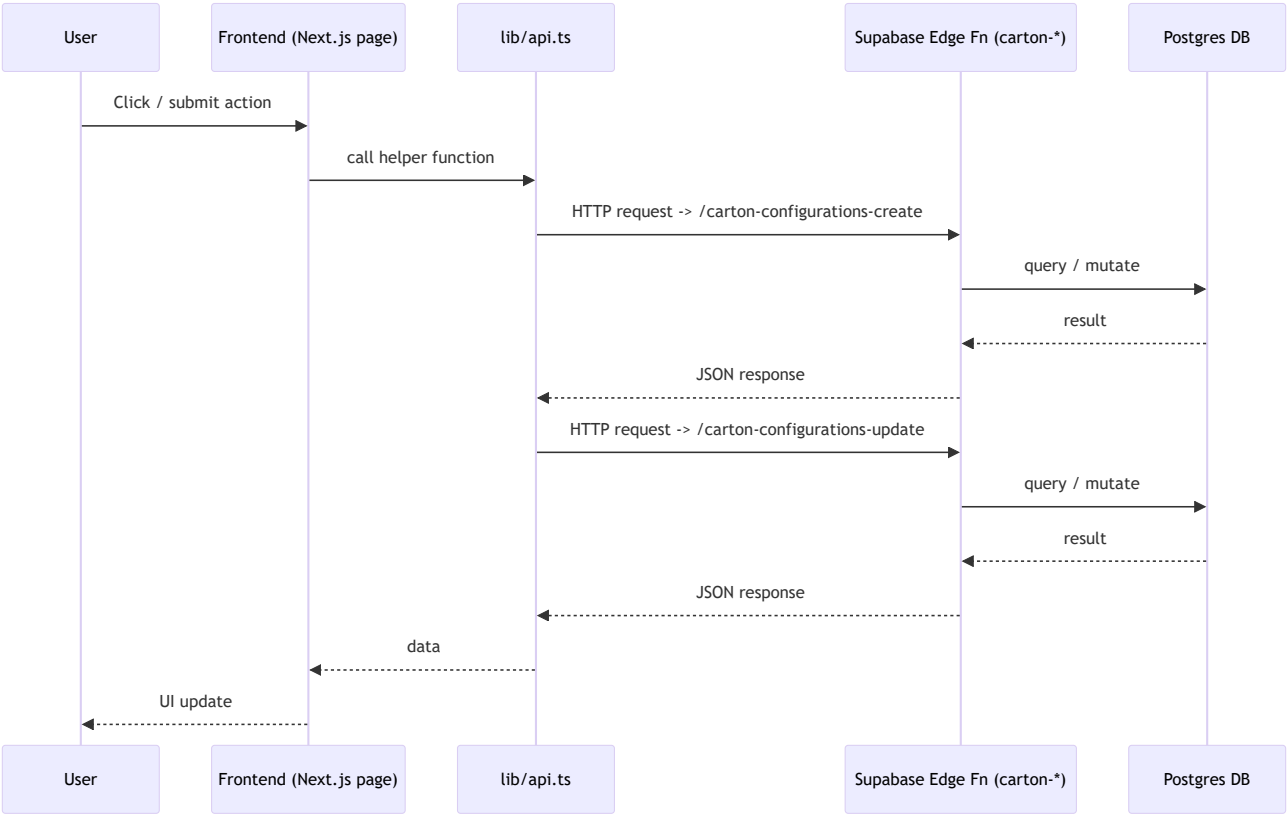

Module: batches

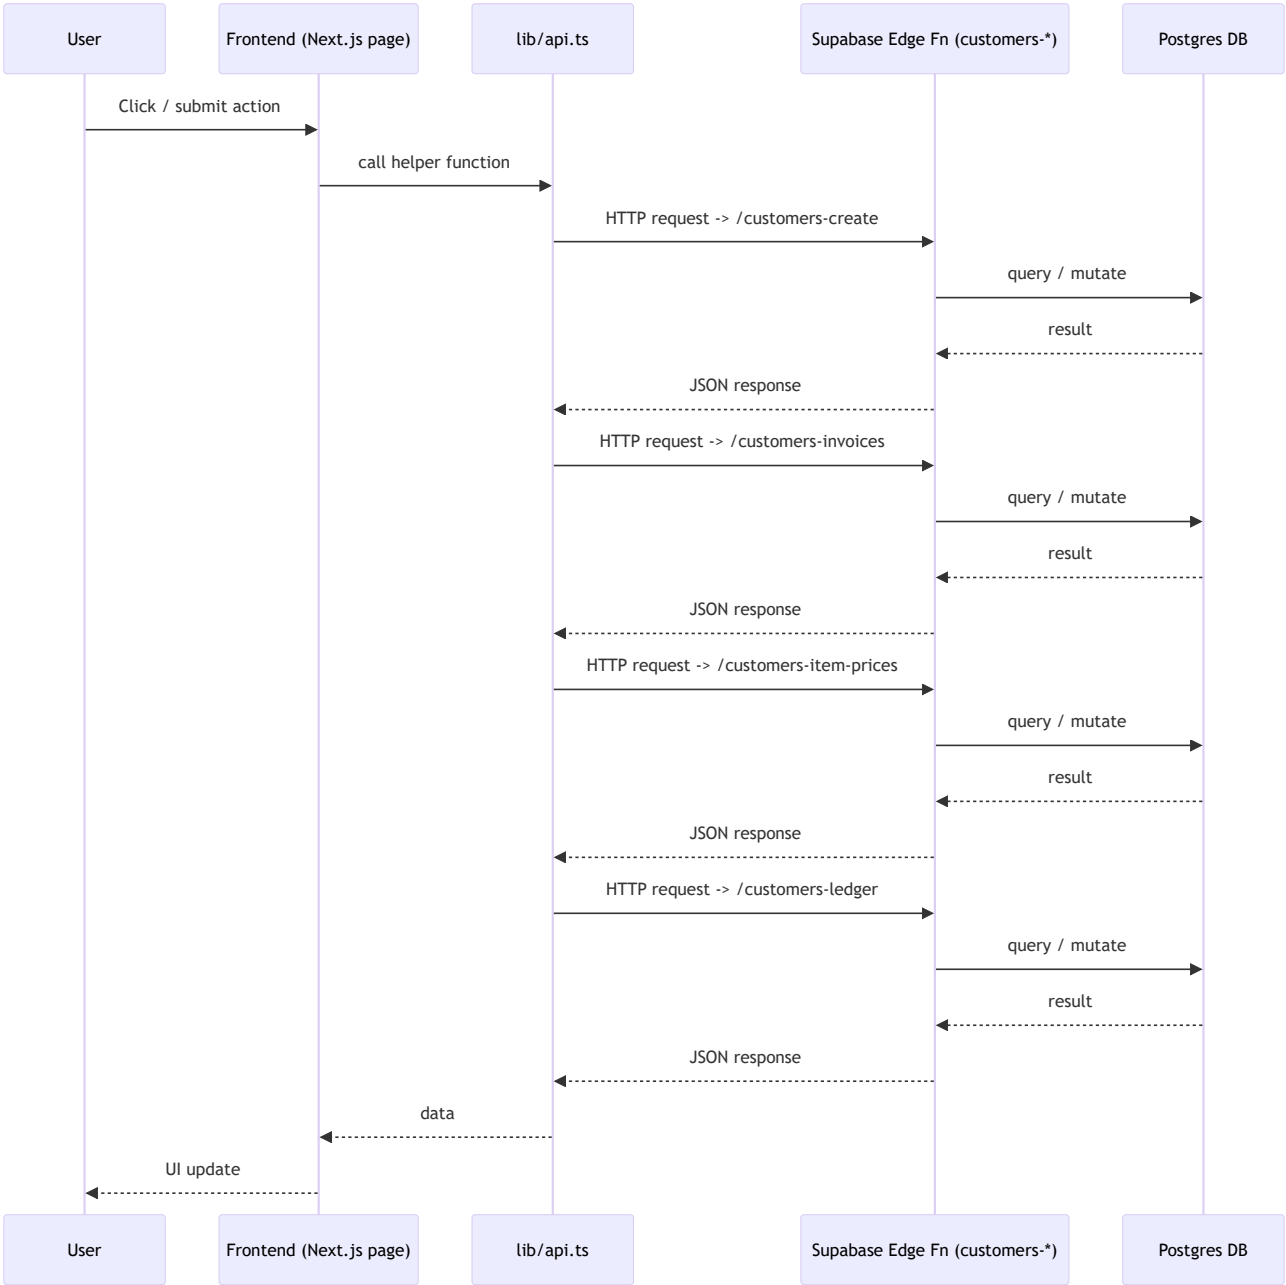

Module: boxes

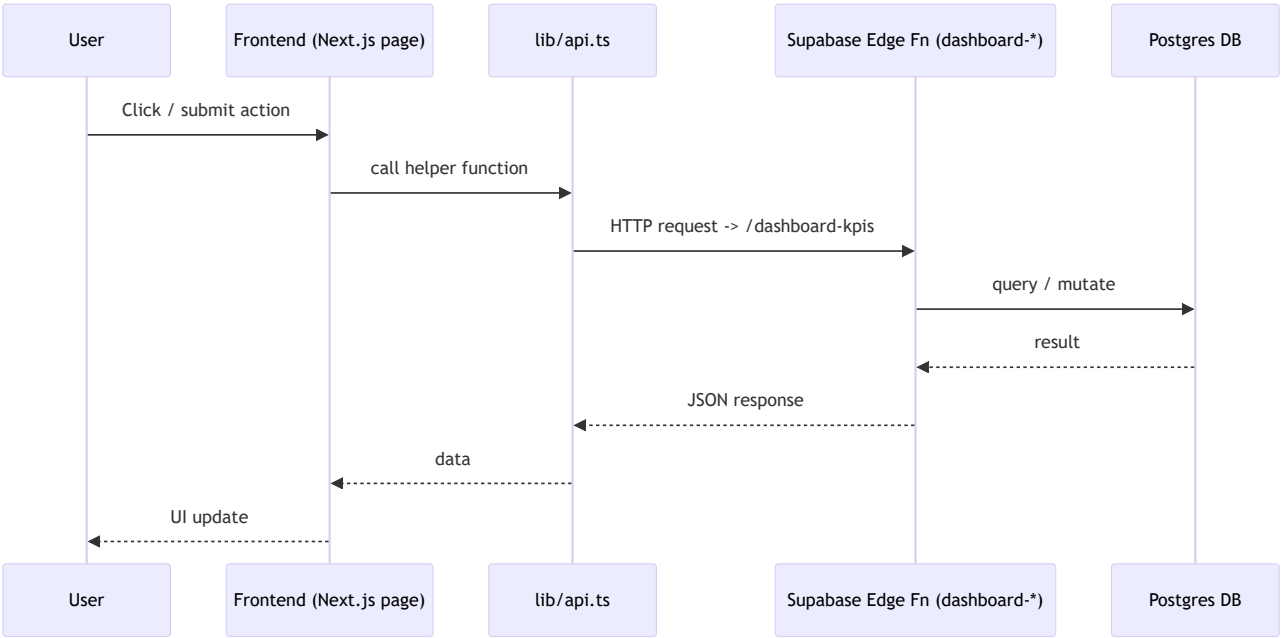

Module: carton

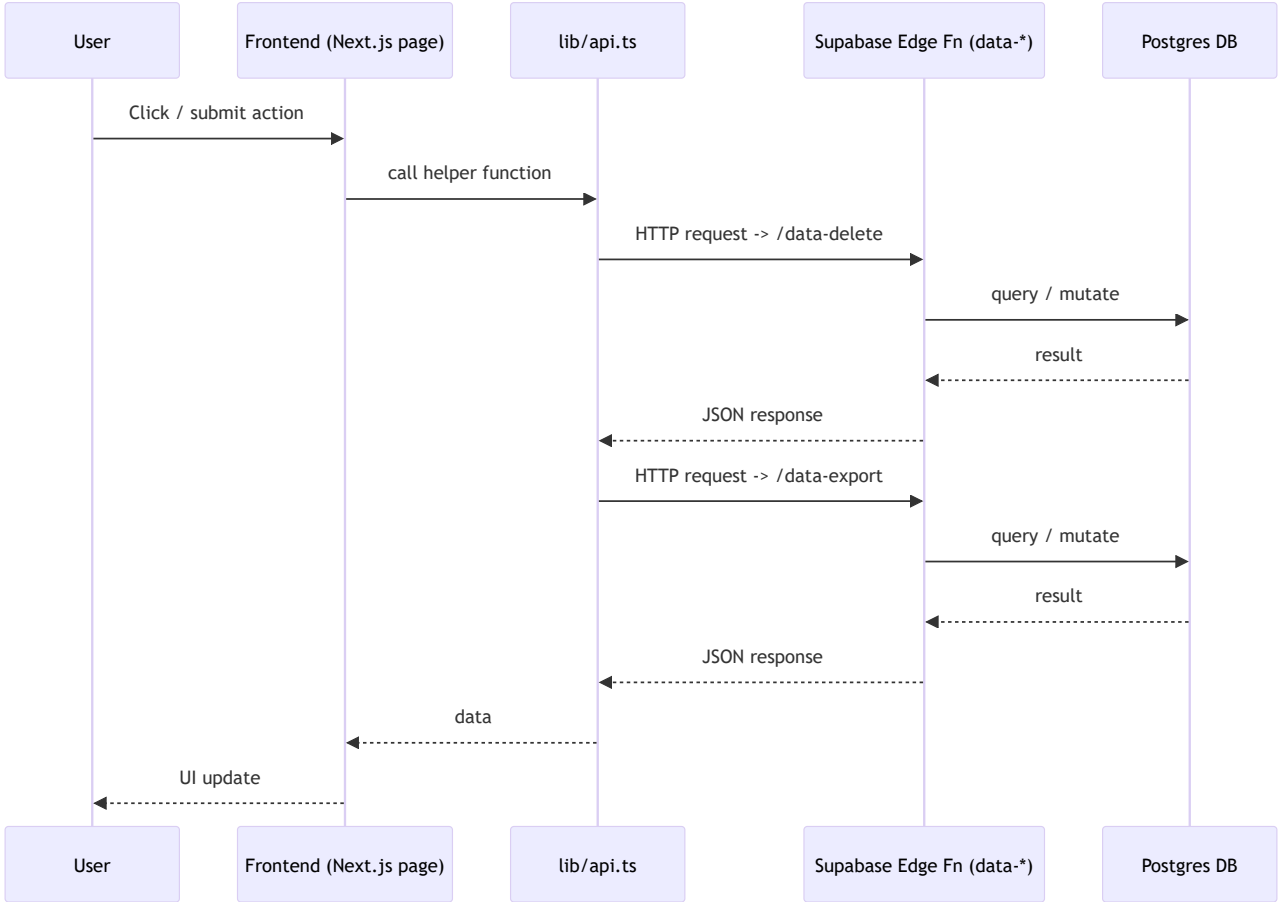

Module: customers

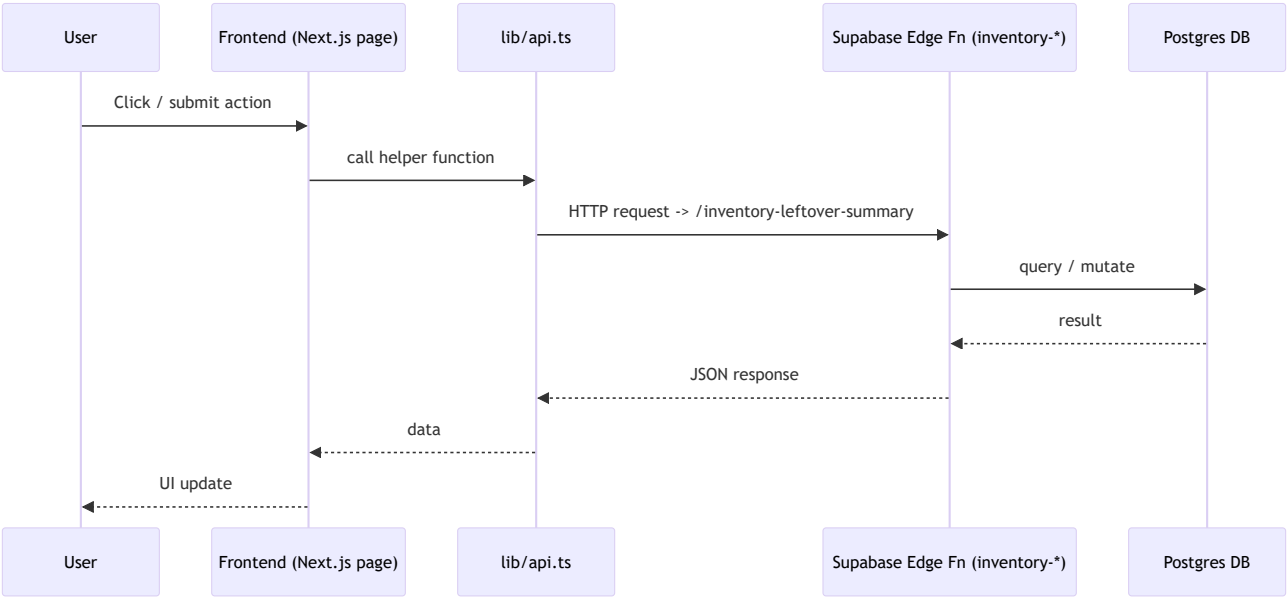

Module: dashboard

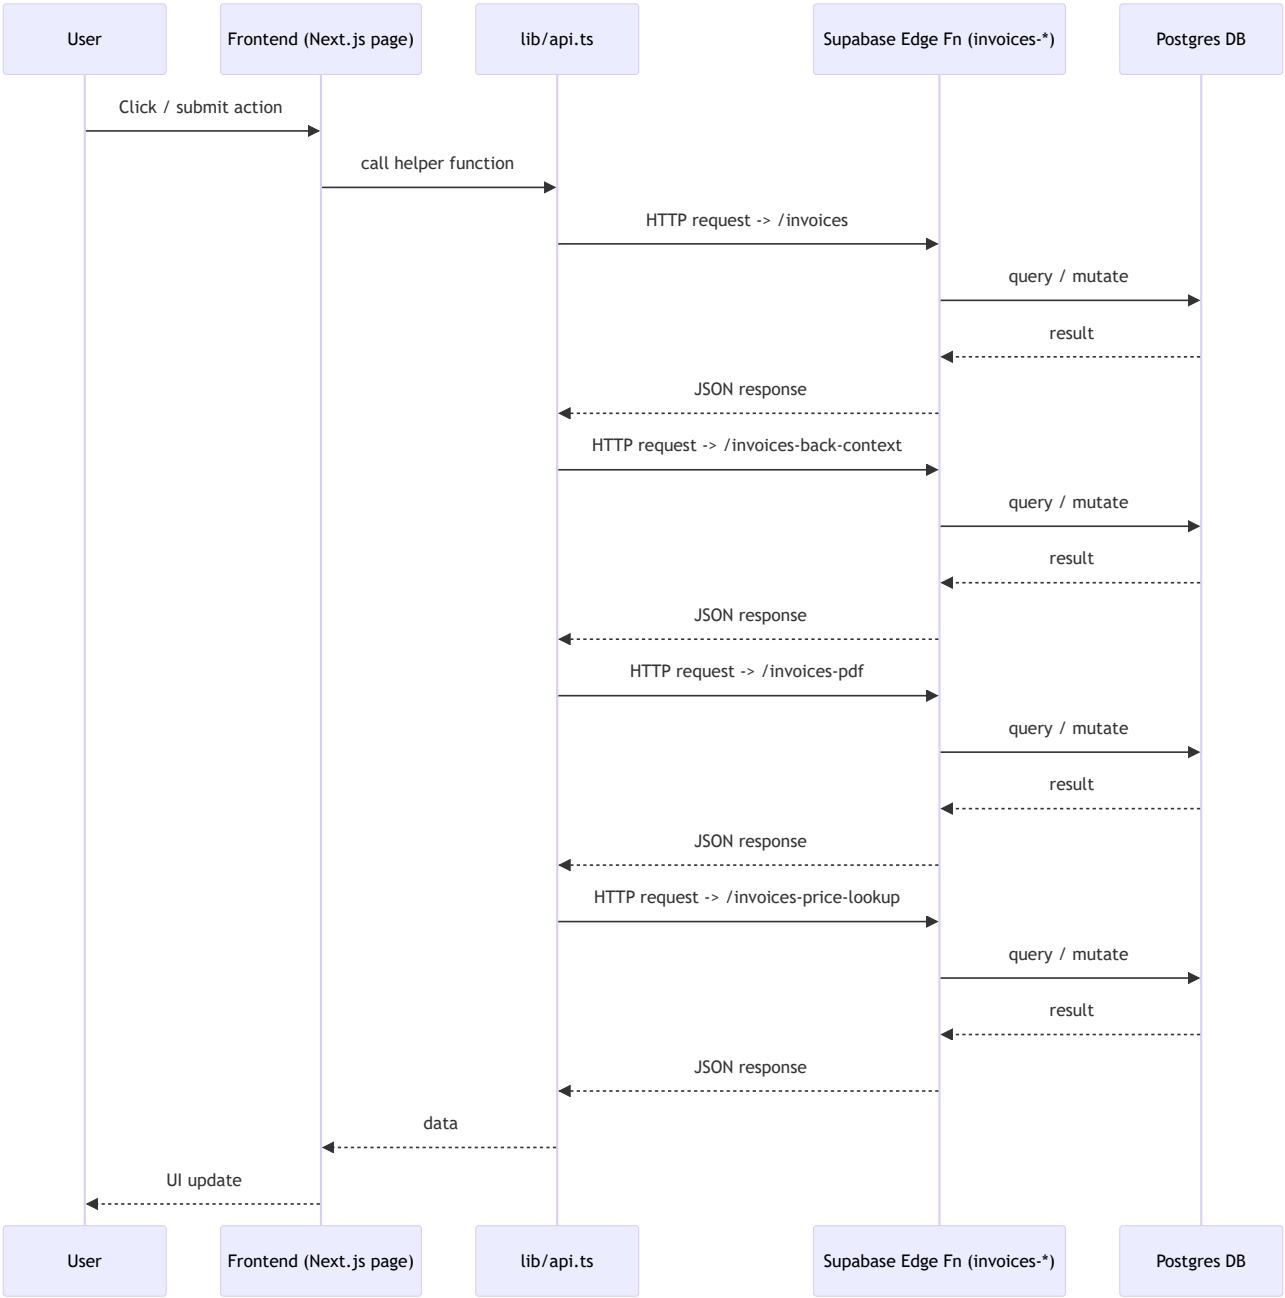

Module: data

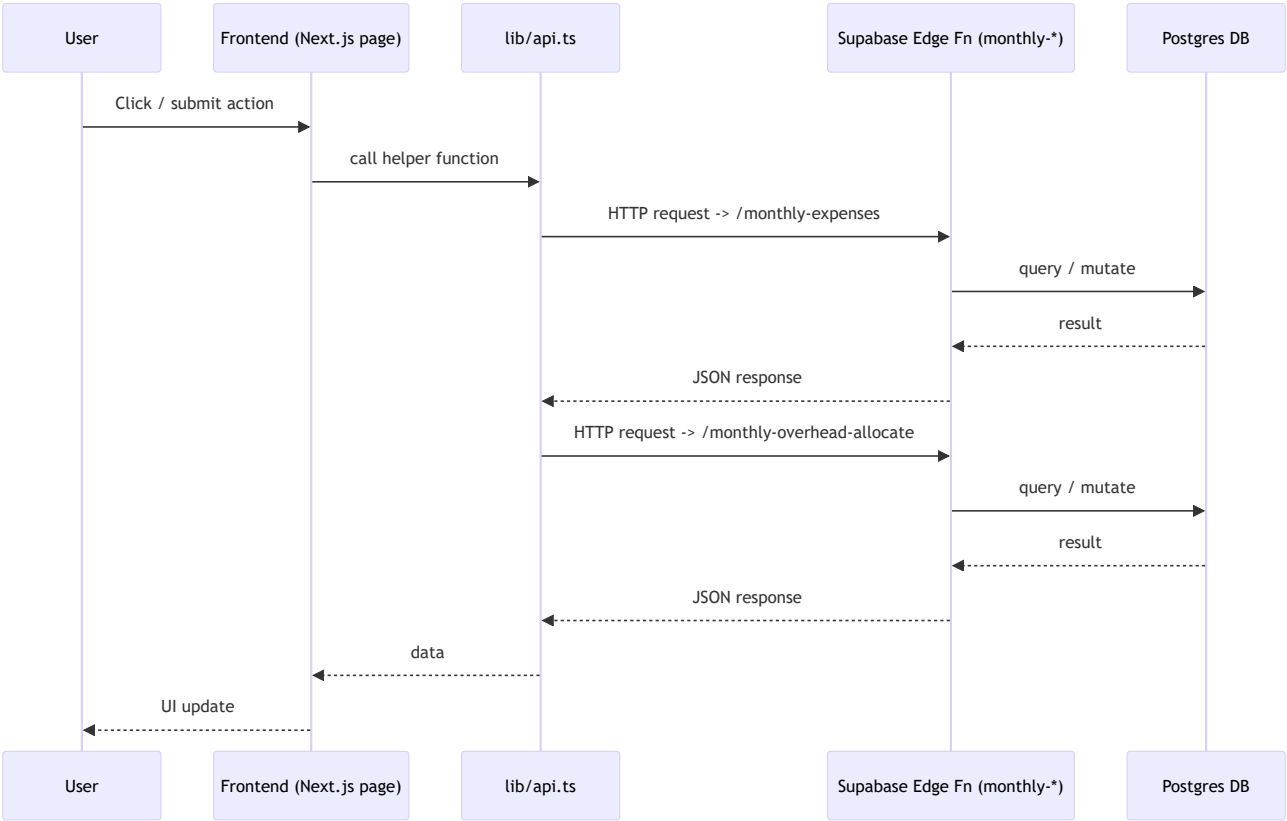

Module: inventory

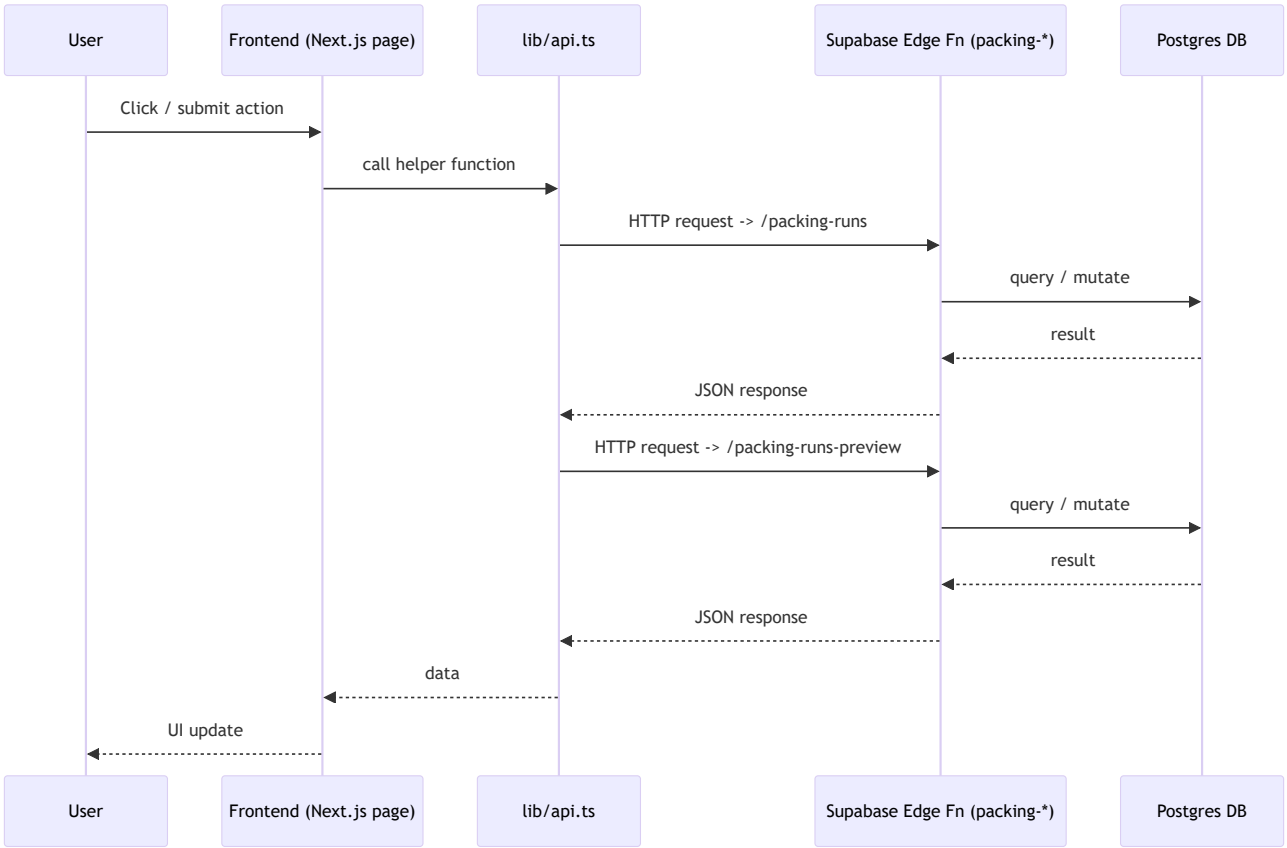

Module: invoices

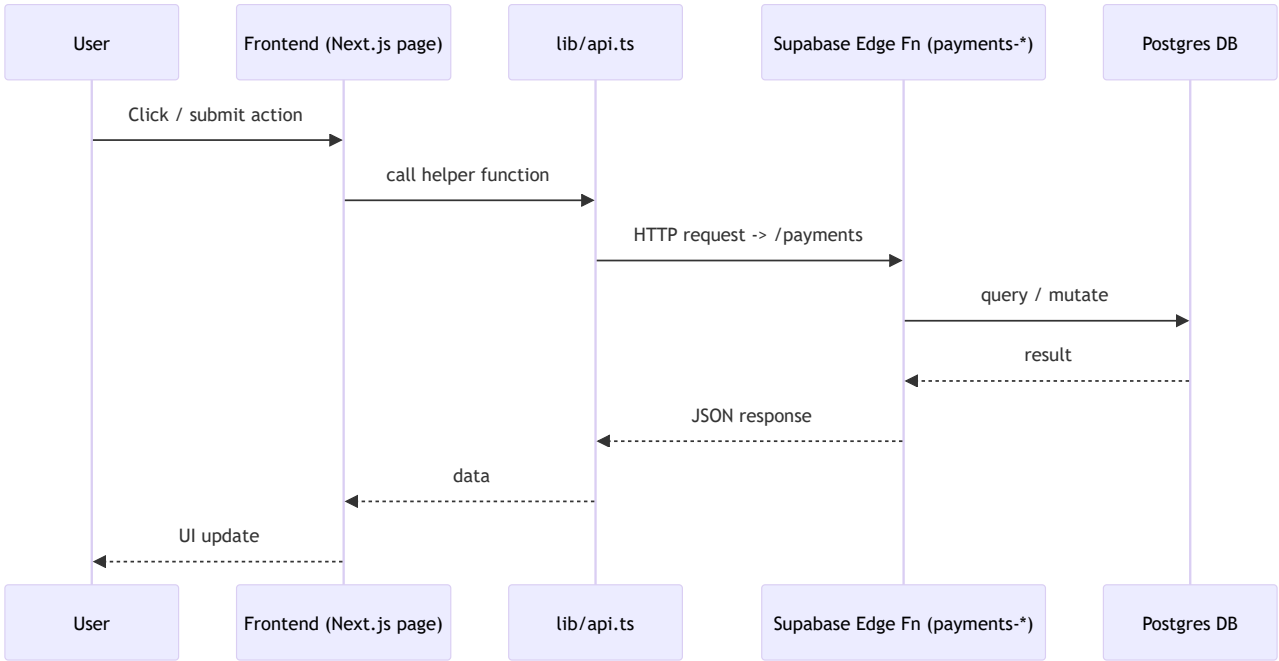

Module: monthly

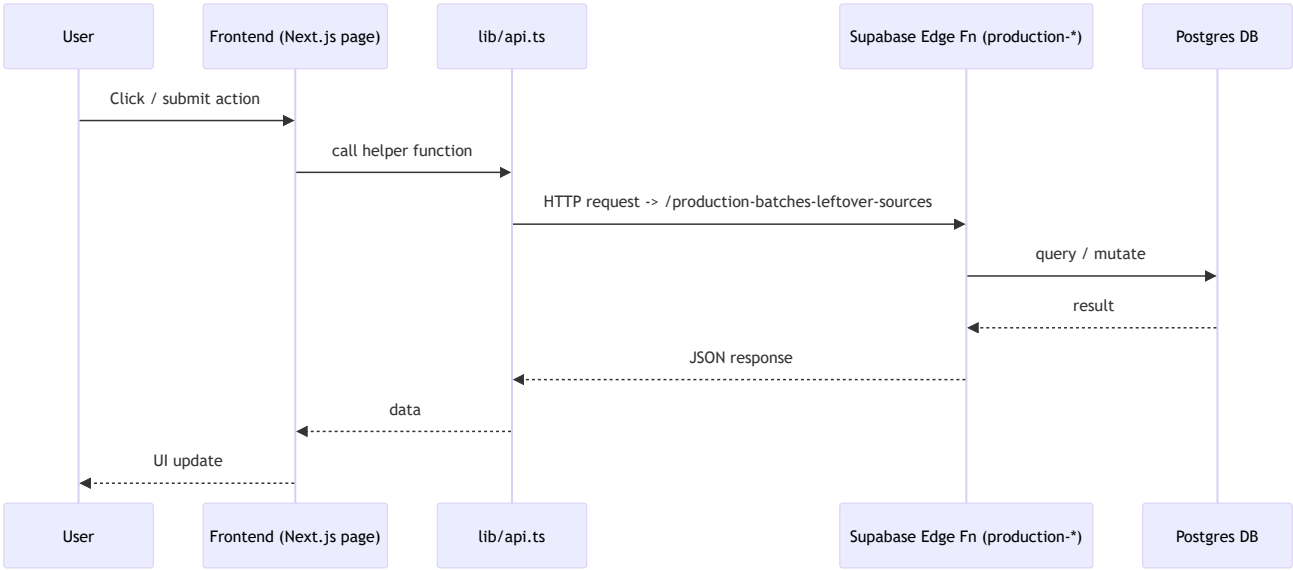

Module: packing

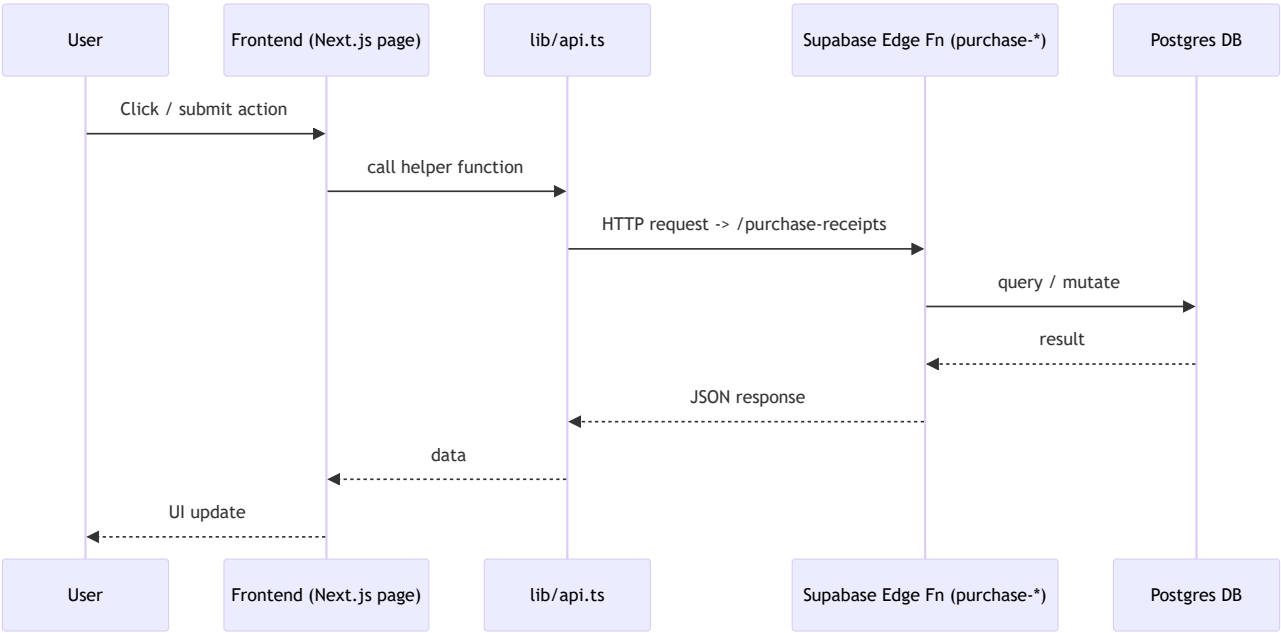

Module: payments

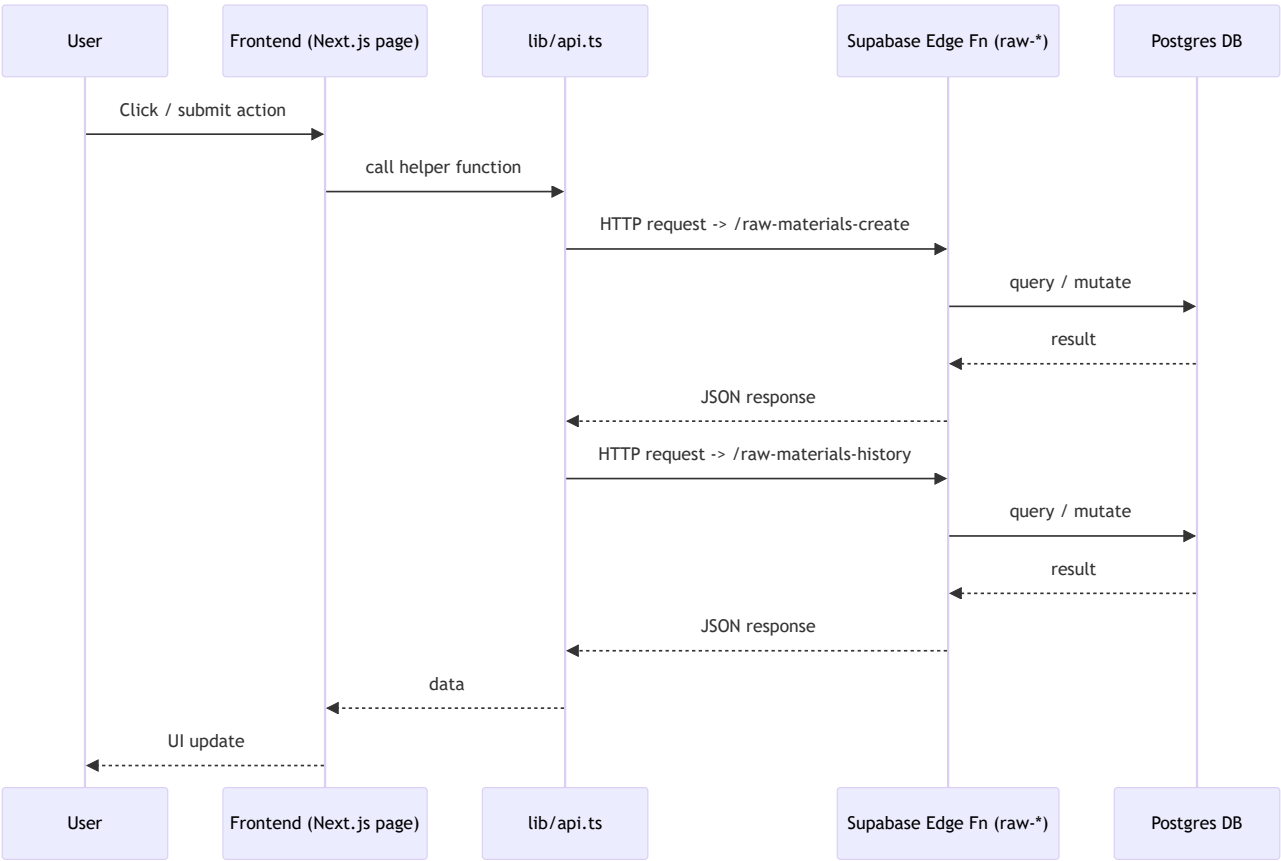

Module: production

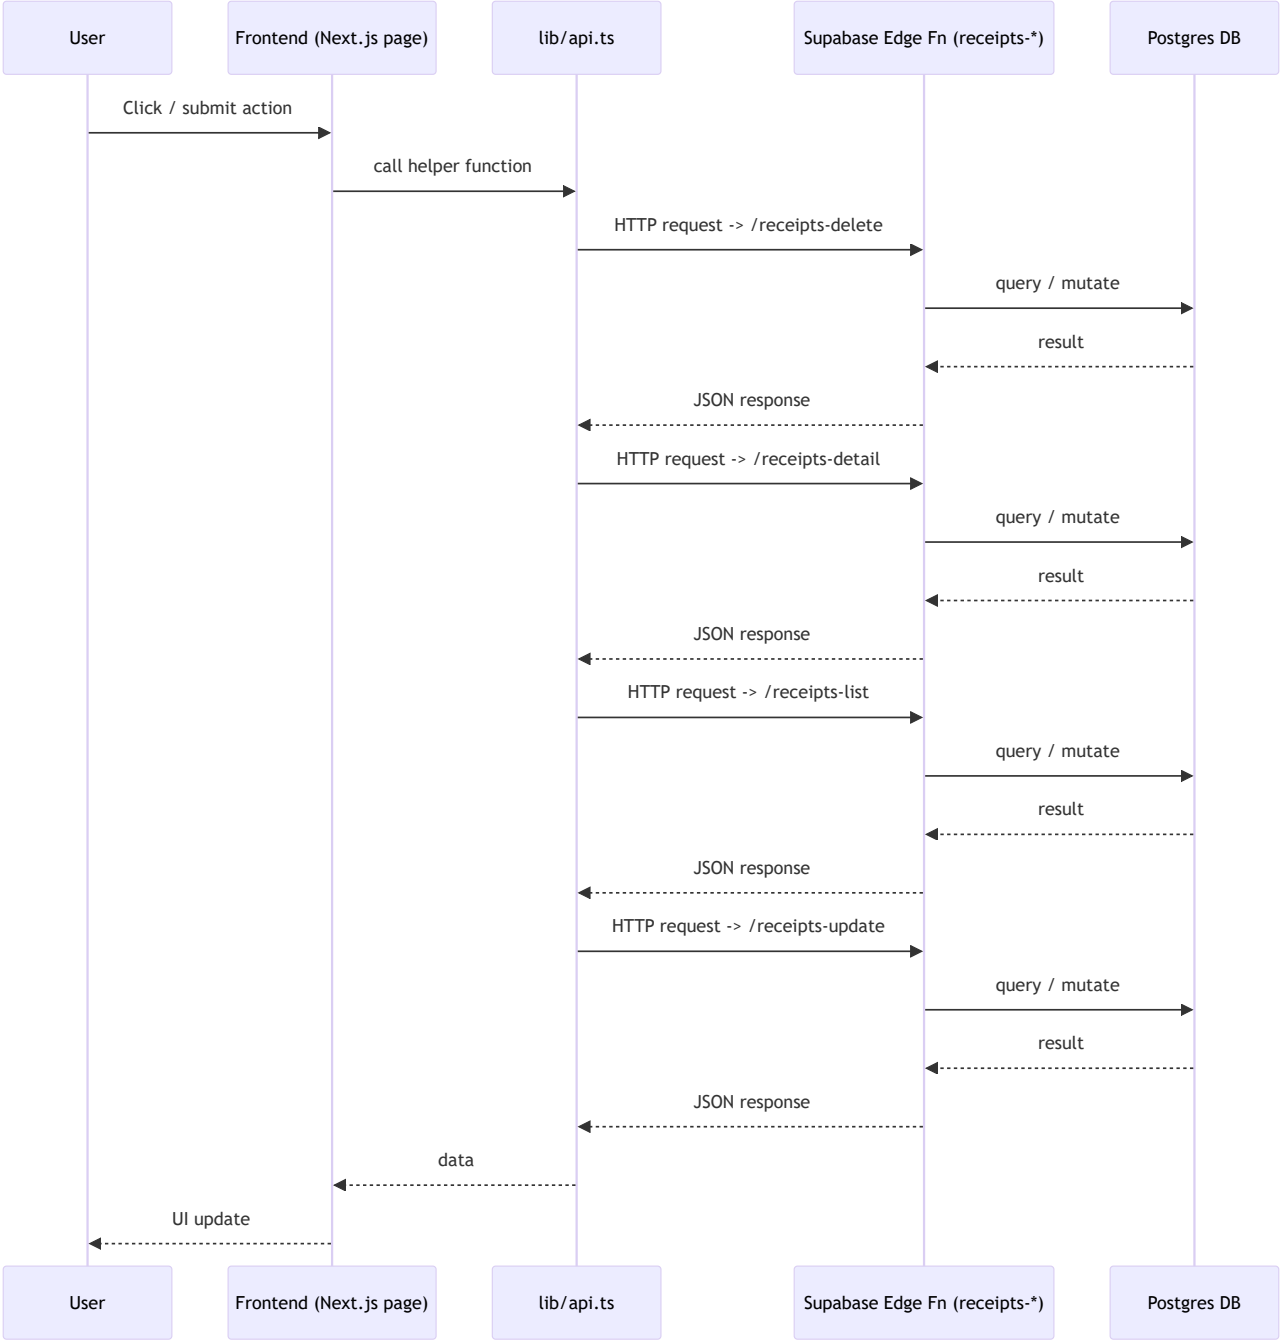

Module: purchase

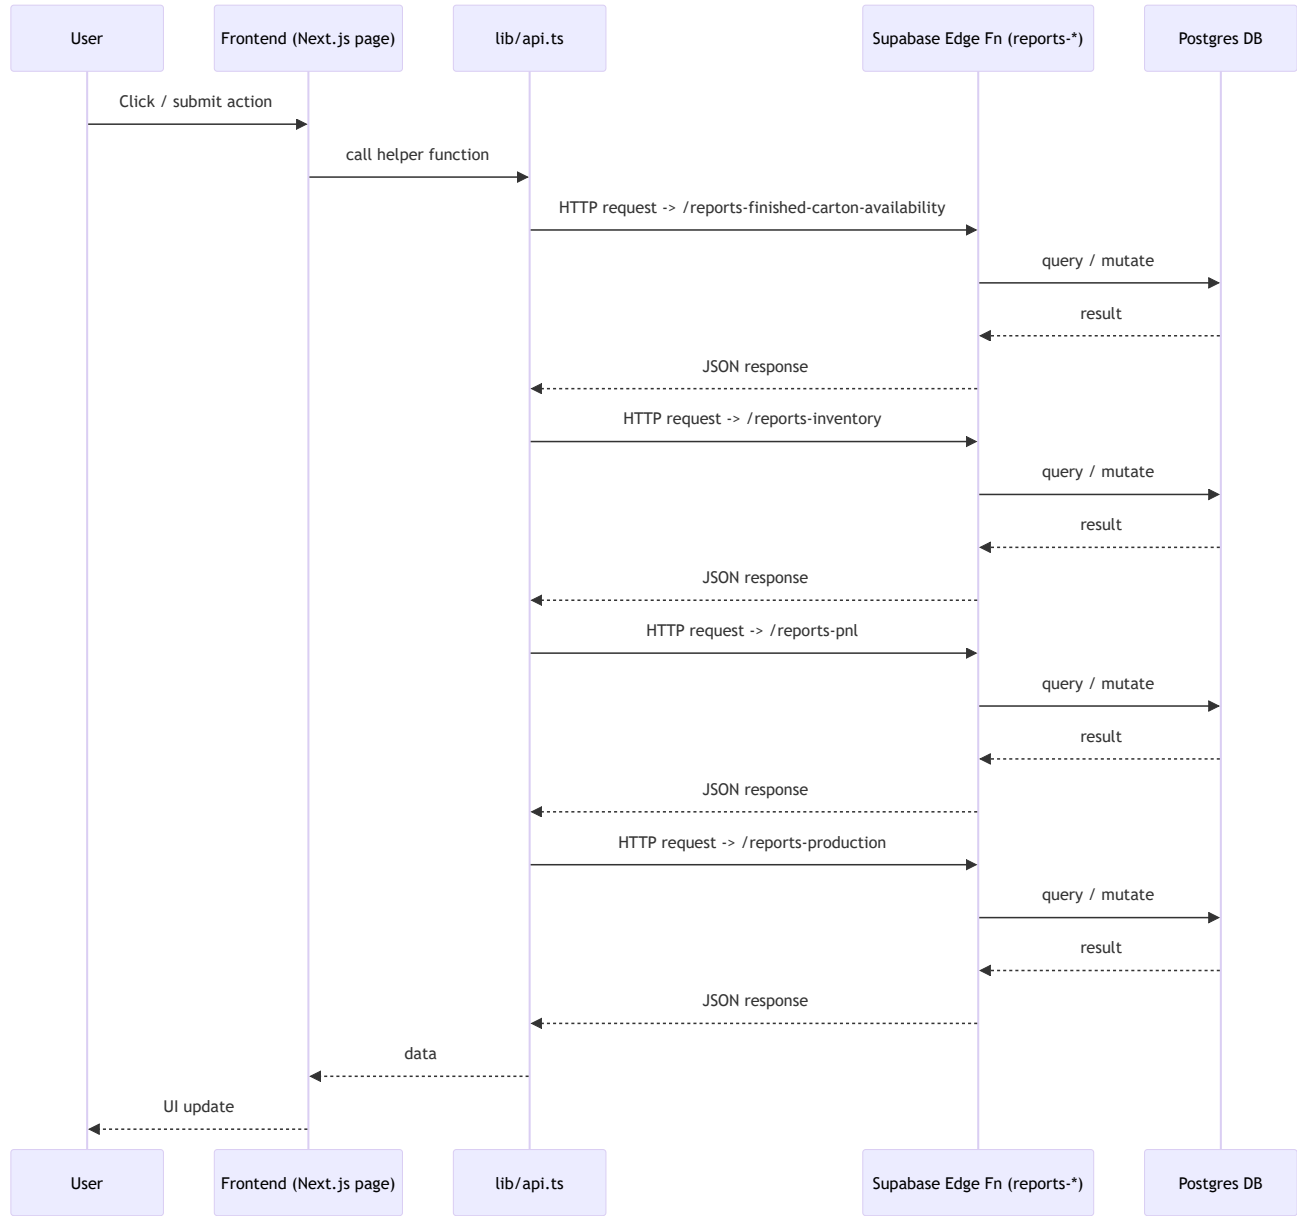

Module: raw

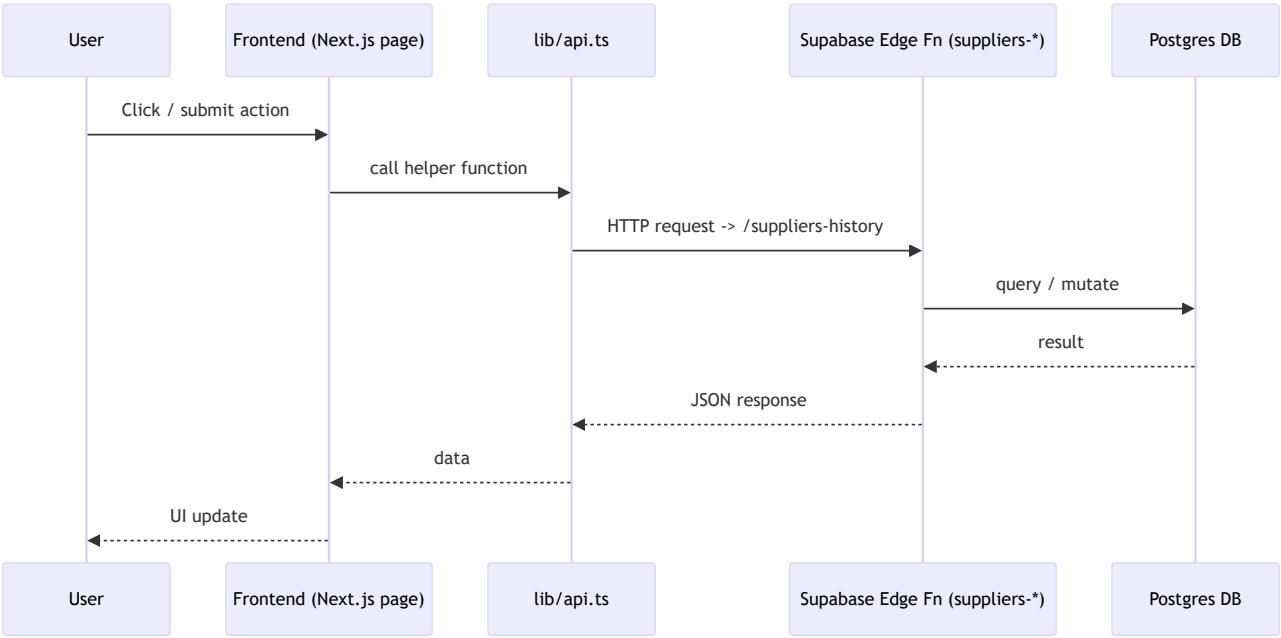

Module: receipts

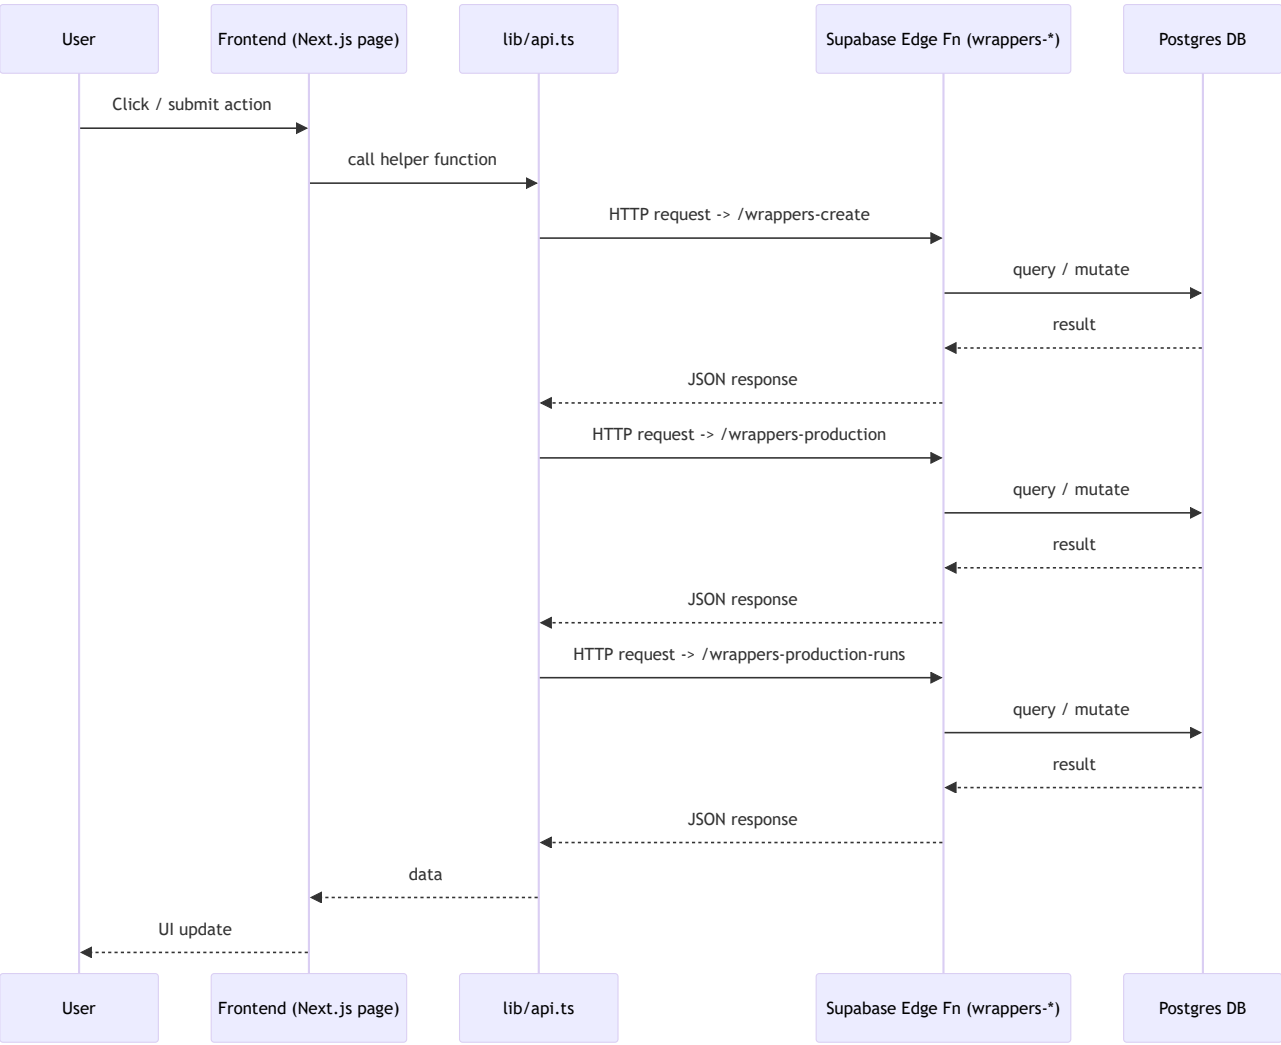

Module: reports

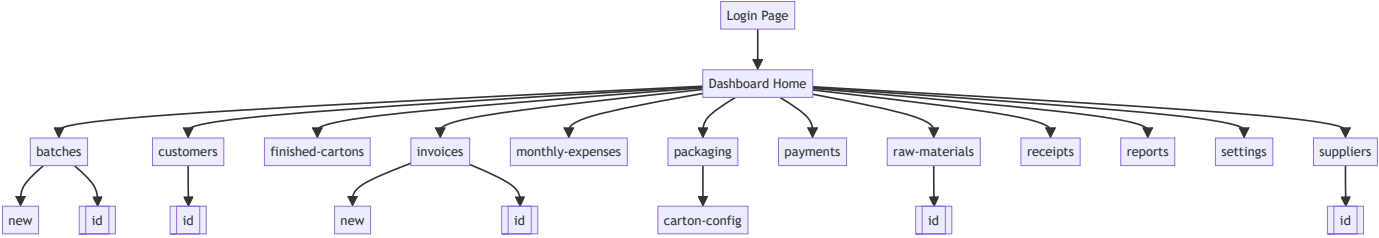

Module: suppliers

Module: wrappers

Phase 7: Navigation / Flow Diagram

Phase 8: Backend API Live Test (apps/backend Express server)

Method	Route	HTTP Status	Result	ms
GET	/api/health	200	WORKING	50
GET	/api/kpis	200	WORKING	46
GET	/api/raw-materials	200	WORKING	46
POST	/api/raw-materials	201	WORKING	188

Phase 12: RPC Functional Smoke Test (real payload, opt-in)

NOT RUN - pass -RunRpcSmokeTest to enable. This phase invokes real RPCs (e.g. fn_create_invoice) with a real payload built from real DB rows, catching functional/key-mismatch bugs that a plain reachability check (Phase 9) cannot see. It can mutate real data - see per-RPC side effects before enabling on production.
